

**1<sup>st</sup> Issue: assessment of coastal CC effect needs data and methodologies at a more detailed scale to be actually effective on decision making process.**

**EC must profitably take into account the experiences developed by the Mediterranean Regions and refers to their gathered datasets in the implementation of the EU strategies concerning:**

✓ Coastal Adaptation to CC (*EUROSION-MED project*)

✓ Coastal Flood risk assessment (*Flood Directive*)

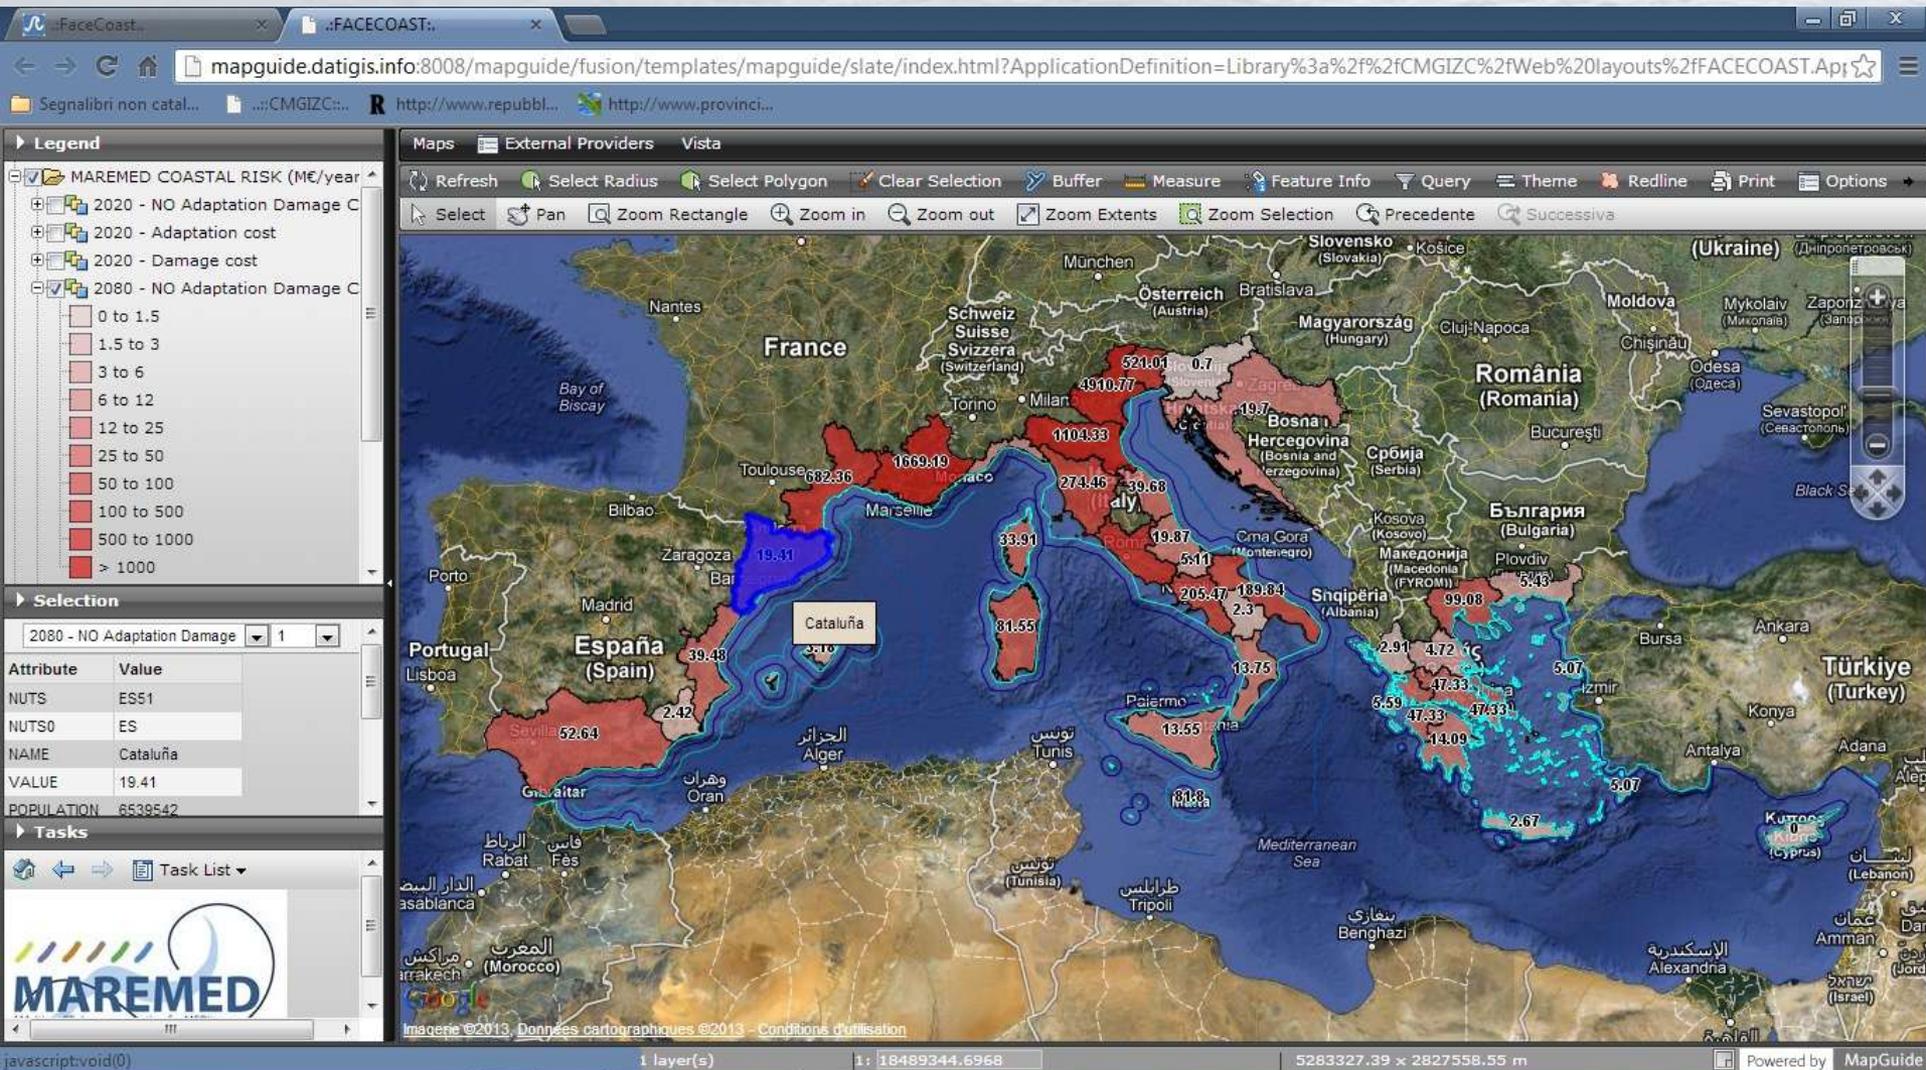

✓ MSP and CM *according to the upcoming Directive*

**Shoreline Evolutionary trends according to EUROSION (1:100.000 - 2004)**

**Shoreline Evolutionary trends according to MAREMED (1:10.000 - 2013)**

**2<sup>nd</sup> Issue: European projects need more cooperation and coordination from a technical point of view to be more effective**

**The Clusterisation must be structurally encompassed into the European programs and adequately fostered in order to:**

- ✓ Capitalize experiences *multi-sectoral, multi-levels*
- ✓ Develop synergies/services *among different sectors*
- ✓ Raise awareness *on threats and opportunities*
- ✓ Avoid/reducing overlaps *among project activities*
- ✓ Promote new Projects *coordinated between programs*

**3<sup>rd</sup> Issue: Mediterranean challenges need more integrated actions involving Regions to be more effective and actually influencing territorial realities during 2014-2020 period.**

**The Macro-Project (a coherent and structured list of projects previously defined by a cluster of Regions) represents a strategic formula to be included into EU programs in order to:**

✓ Guarantee a territorial impact

✓ Assure more coordination among EU funds

✓ Achieve strategic results *at macro-regional scale*

✓ Test Macro-Regional actual “potentialities”

**COUNCIL REGULATION (EC) No 1083/2006**

**of 11 July 2006**

**laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund and repealing Regulation (EC) No 1260/1999**

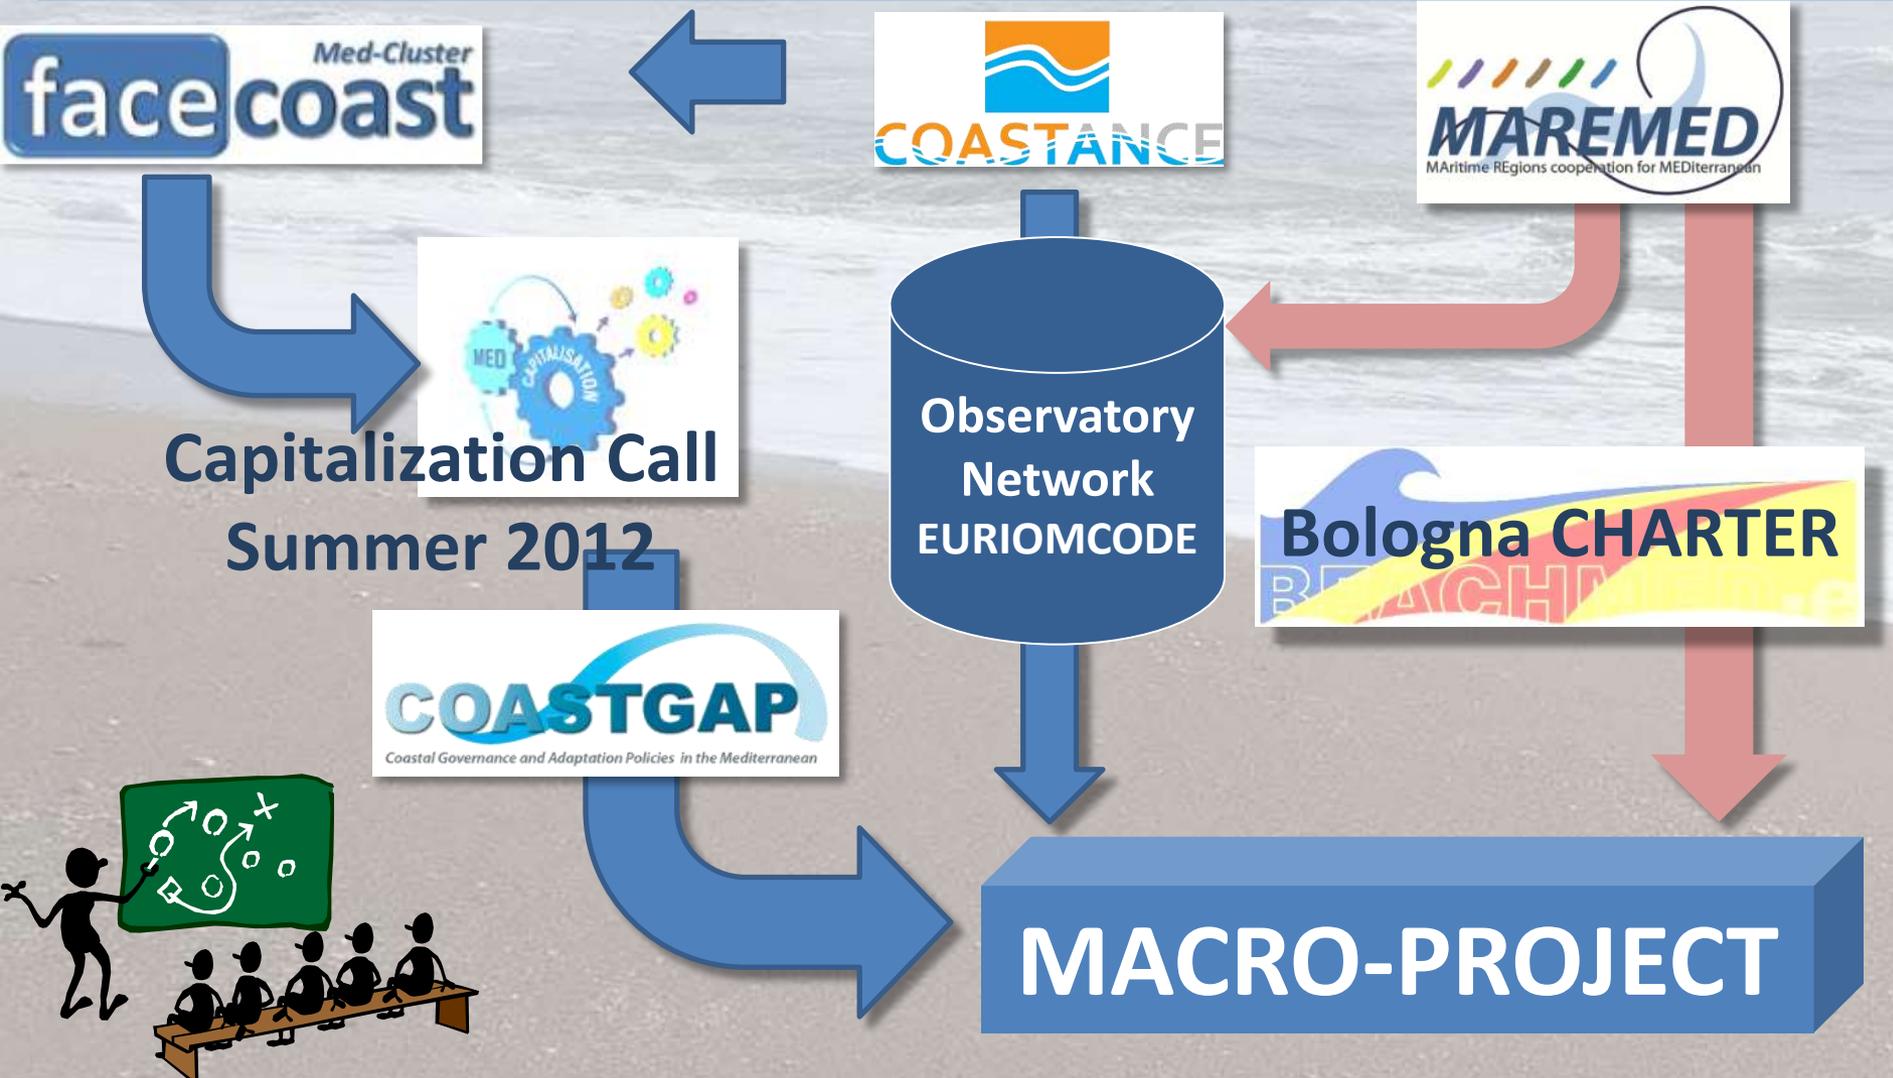

**Major projects**

*Article 39*

**Content**

As part of an operational programme, the ERDF and the Cohesion Fund may finance expenditure in respect of an operation comprising a series of works, activities or services intended in itself to accomplish an indivisible task of a precise economic or technical nature, which has clearly identified goals and whose total cost exceeds EUR 25 million in the case of the environment and EUR 50 million in other fields (hereinafter referred to as major projects).

## Three "legs" for the MACRO-PROJECT "Beacmed-3"

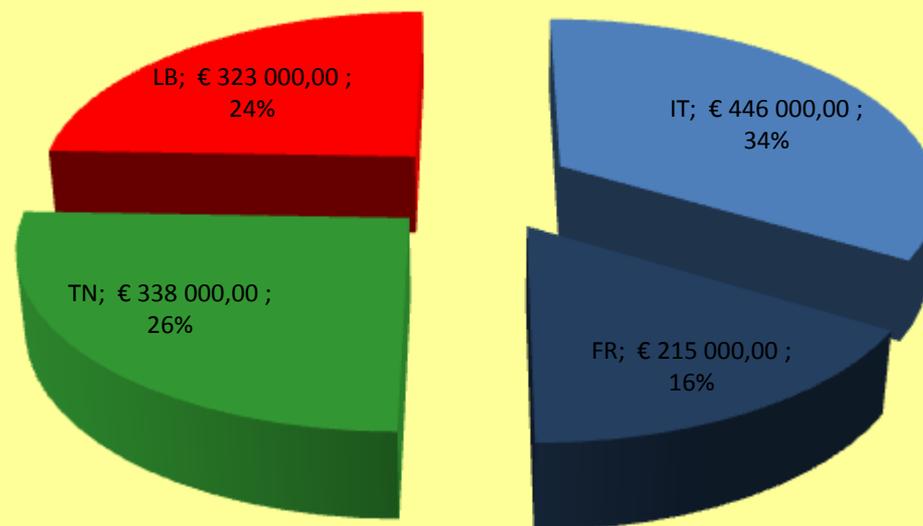

# 3. Next Initiatives

## MACRO-PROJECT “Beacmed-3” According to the Bologna Charter 2012

- ✓ to build a network of the existing coastal Observatories – EURIOMCODE
- ✓ to assess hazards and risks along the MED coasts - EUROSION-MED
- ✓ to promote the sustainable use of the strategic resources the coastal territory according to MSP and CM by concrete example of integrated planning
- ✓ to promote the sustainable use of the strategic resources like the coastal and submarine stocks of sediments
- ✓ to design and execute structural works along Mediterranean coasts
- ✓ to foster project-clustering initiatives like “FACECOAST
